Public Water Systems Operator's Tools & Techniques

6 WATER CONTACT HOURS

Operators have an extensive assortment of tools to help during operations and maintenance. However, we can have all the tools in the world, but if we don't understand the value and know how to use them properly, they will do us little good. Adequate supplies of safe water is far from natural. The operators tool box that has been built over the last 1,000 years requires knowledge, skill, ability and desire. The most effective way to manage drinking water systems and reduce risks to public health is to implement a multi-barrier approach. Nature's refreshment needs our help. Keep learning, building and working to provide the public with a safe, adequate supply of water. Find every tool, compartmentalize it appropriately, and use it effectively.

Topics to be covered:

- Drinking Water Sources
- Current Regulations
- Treatment Needs and Options
- Multiple Barrier Approach

Instructor:
Wendy Malehorn

Training & Education Development

Wendy has been employed with PA Rural Water since 2015 and is a Training & Education Development Specialist. Wendy's education includes earning a Bachelor of Science in Public Health with a concentration in Environmental Health from West Chester University in 1996. Wendy earned a PA DEP Class A,E license with subclasses 1 through 14 in 1997 and has worked in operations at both a large surface water system and small ground water systems in the commonwealth. Wendy also worked as a certified trainer for the PA DEP and the Environmental Training Center at the Pennsylvania State University.
