**Instructor:** Bill Kasper

**Location:**

Shady Maple Smorgasbord  
129 Toddy Drive  
East Earl, PA 17519

**About the Class:**

**Health and Safety Considerations for W & WW Operators:** Safety is one of the most overlooked aspects of being a water/wastewater operator. Many operators have the attitude that it can't happen to me. This course is a general overview of the safety issues operators should be aware of.

**Confined Space and Trenching:** Protecting the health and safety of workers is important to the operation of the system. Two threats to these workers are confined spaces and trenches. Upon completion of this course, participants will understand the steps they can take to make themselves and others safer in these dangerous areas.
