Date: November 4, 2026

Class Time: 8:00 AM to 3:30 PM

Contact Hours: 6 Water & Wastewater

Instructor: PADEP Energy Programs

& Chad Heister

Location:

Holiday Inn

604 Station Road

Grantville, PA 17028-9157

Energy Planning for Your Plant: This session is designed to assist both water (500,000 gal per day and larger) and wastewater utilities (greater than 0.6 MGD) with tracking their energy utility usage, understand how they can best create or update their energy security plan by understanding back-up generation requirements and liquid fuel supply chains, and guide plants to tools available to assist in examining renewables, energy storage and other microgrid opportunities to better prepare for energy cost increases and energy disasters.

Energy Efficiency: The Cost of Water & Wastewater: The cost of doing business in the water/wastewater industry. Making sure to have sufficient revenues to cover costs and cash reserves for sustainability. Learn about energy consumption in the US, high energy costs in your system and how to reduce them.
