

Water Operator Certification Training Program For Spring 2019 Exam - Centre County

Treatment professionals epitomize a public health official. They are committed to eliminating and preventing harm from materializing while producing and distributing safe drinking water to millions of Americans. In Pennsylvania, a person may not independently make a process control decision at a water system unless that person is board-certified. To meet certification requirements, applicants must pass the appropriate examinations, meet minimum education requirements, and meet experience requirements.

The PRWA Water Professionals Certification Training Program provides training and guidance to assist operators in gaining the knowledge and skills necessary to not only achieve certification, but to also understand the responsibility of being a Water Treatment Professional.

Participants will be expected to attend all 12 days of training, complete all homework and take two examinations (prior to the DEP certification examination) through the training program.
