

#3562
Microbiology of Anaerobic Digesters

#3245
Troubleshooting the SBR

6 WASTEWATER CONTACT HOURS

Microbiology of Anaerobic Digesters: The course reviews five areas of concern related to the microbiology and successful operation of anaerobic digesters, including causes and corrective operational measures for foam and scum production.

Troubleshooting the SBR: Troubleshooting the SBR presents a description and history of the batch feed system for the treatment of wastewater. The description includes a biological review of each phase, phase time and adjustments in phase times in the SBR, along with the occurrence of toxic, anoxic, and anaerobic conditions. Process control measures, target nutrient values, sampling techniques, and troubleshooting charts are reviewed. An examination of biological and chemical nutrient removal measures (nitrogen and phosphorus) is presented.

Topics to be covered:

- Bacteria involved in degradation of soluble, colloidal and particulate BODs
- Acceptable operating conditions
- Troubleshooting process and control measures
- History of wastewater treatment and the role of SBR
- Nutrient removal in SBR

February 14, 2019

Wyndham Garden York
2000 Loucks Road
York PA, 17408
York County

Class Time: 8:00 am - 4:00 pm

Registration: 7:30 am

*Lunch and materials provided
with your registration*

Instructor: Michael Gerardi
Wastewater Microbiologist

MEET THE INSTRUCTOR

Michael Gerardi

Wastewater Microbiologist

Michael has developed and offered numerous wastewater biology courses in the United States, Canada, Caribbean and Europe. He has over 35 years experience in the wastewater treatment profession and has authored seven wastewater microbiology texts for John Wiley and Sons. He has performed microscopic analyses of wastewater samples and provided troubleshooting services for numerous municipal and industrial wastewater treatment facilities. He managed the Williamsport Sanitary Authority wastewater treatment facilities for 10 years.
