

#6951
Septage and Toxicity

#3776
Wastewater Bacteria

6 WASTEWATER CONTACT HOURS

Septage and Toxicity: This course reviews the composition of septage, its impact upon biological treatment processes including toxicity and operational measures for the safe handling and treatment of septage. Toxicity and its mode of attack are described, and toxic inorganic and organic wastes and their partitioning in the activated sludge process are presented. Relative quantities of toxic wastes that are needed to cause toxicity are reviewed and discussed with respect to their impact upon cBOD removal, nitrification and methane production. Operational measures for preventing and recovering from a toxic event are addressed. Indicators of an unstable biomass are reviewed.

Wastewater Bacteria: This course reviews the significant bacterial groups, the roles they perform in wastewater treatment and the operational conditions that affect their activity.

Topics to be covered:

- Undesired growth of filamentous
- Toxicity
- Identifying potential dischargers of toxic wastes
- Significant bacterial groups responsible for the success or failure of a wastewater treatment process
- Roles performed by aerobic, facultative anaerobic and anaerobic bacteria

April 16, 2019

Comfort Inn
100 S. 4th Street
Huntingdon, PA 16652
Huntingdon County

Class Time: 8:00 am - 4:00 pm
Registration: 7:30 am

*Lunch and materials provided
with your registration*

Instructor: Michael Gerardi
Wastewater Microbiologist

MEET THE INSTRUCTOR

Michael Gerardi

Wastewater Microbiologist

Michael has developed and offered numerous wastewater biology courses in the United States, Canada, Caribbean and Europe. He has over 35 years experience in the wastewater treatment profession and has authored seven wastewater microbiology texts for John Wiley and Sons. He has performed microscopic analyses of wastewater samples and provided troubleshooting services for numerous municipal and industrial wastewater treatment facilities. He managed the Williamsport Sanitary Authority wastewater treatment facilities for 10 years.
