

#1820 Drought Contingency Planning

6 WATER CONTACT HOURS

Preparing a Drought Plan when water supplies look good gives systems the opportunity to really look at the situation in a non-emergency condition. Taking a look at the what-if factor and planning for it and when the stages of drought strike will save systems time and money. Being able to still serve the customer base in a drought condition is a challenge with a plan, doing it without one is a critical situation.

Topics to be covered:

- Assessment of Drought Conditions
- Drought Stages
- Drought Contingency Plans
- Volunteer to Mandatory Rationing
- Leakage and Loss Reduction Program
