

#3019
Activated Sludge: Settleability
Problems and Loss of Solids

#3563
Nitrification

6 WASTEWATER CONTACT HOURS

Activated Sludge: Settleability Problems and Loss of Solids: This course provides a review of the identification, causative factors and control of commonly occurring settleability problems and loss of solids in secondary clarifiers that contribute to permit violations, foam production, increased operational costs and loss of treatment efficiency.

Nitrification: This course will review the biological principles of nitrification and their application for process control, troubleshooting, permit compliance and cost-effective operation in the activated sludge process.

Topics to be covered:

- Undesired filamentous growth
- Nutrient deficiency
- Denitrification
- Role of organotrophic bacteria during nitrification
- Importance of cBOD removal
- Types of BOD and their impact

June 12, 2019
Chambersburg Wastewater
Treatment Facility
725 Hollywell Avenue
Chambersburg, PA 17201
Franklin County

Class Time: 8:00 am - 4:00 pm
Registration: 7:30 am

*Lunch and materials provided
with your registration*

Instructor: Michael Gerardi
Wastewater Microbiologist

MEET THE INSTRUCTOR

Michael Gerardi

Wastewater Microbiologist

Michael has developed and offered numerous wastewater biology courses in the United States, Canada, Caribbean and Europe. He has over 35 years experience in the wastewater treatment profession and has authored seven wastewater microbiology texts for John Wiley and Sons. He has performed microscopic analyses of wastewater samples and provided troubleshooting services for numerous municipal and industrial wastewater treatment facilities. He managed the Williamsport Sanitary Authority wastewater treatment facilities for 10 years.
