

#6056

Troubleshooting the Activated Sludge Process with a Microscope

#3564

Wastewater Pathogens

6 WASTEWATER CONTACT HOURS

Troubleshooting the Activated Sludge Process with a Microscope: This course provides an in-depth review of the use of the microscope as a troubleshooting and process control measure for the activated sludge process.

Wastewater Pathogens: This course reviews the disease agents associated with wastewaters, sludges, compost, aerosols and contaminated materials. Disease agents present include viruses, bacteria, fungi, protozoa and helminths (roundworms and tapeworms). Special reviews are offered for Hepatitis viruses, HIV (AIDS virus) and West Nile Virus, Leptosporosis, Giardiasis, Cryptosporidium and roundworm and tapeworm diseases. Disease transmission, body defenses and hygiene measures are presented.

Topics to be covered:

- Components of microscopic analyses
• Microscopy as a diagnostic tool
• Disease transmission and infection
• Groups of pathogens
• Infected hosts in the community

MEET THE INSTRUCTOR

Michael Gerardi

Wastewater Microbiologist

Michael has developed and offered numerous wastewater biology courses in the United States, Canada, Caribbean and Europe. He has over 35 years experience in the wastewater treatment profession and has authored seven wastewater microbiology texts for John Wiley and Sons. He has performed microscopic analyses of wastewater samples and provided troubleshooting services for numerous municipal and industrial wastewater treatment facilities. He managed the Williamsport Sanitary Authority wastewater treatment facilities for 10 years.
