

#978

Biological Nutrient Removal in the Activated Sludge Process

5.5 WASTEWATER CONTACT HOURS

The course provides an in-depth review of the bacteria, operational conditions and biological principles that influence nitrification, denitrification and biological phosphorus removal. The course also provides biological, chemical and physical measures for monitoring and regulating BNR for permit compliance, process control and cost-effective operation. Required, desired and accidental occurrences of nitrification and denitrification are presented. Troubleshooting and correctiveness measures for accidental nitrification and denitrification also are presented.

Topics to be covered:

- Biological principles of nitrification
- Nitrogenous wastes and their impact upon the treatment process
- Benefits of denitrification
- Oxic, anoxic and anaerobic respiration

August 7, 2019

Holiday Inn
600 Wildflower Drive
Wilkes-Barre, PA 18702
Luzerne County

Class Time: 8:00 am - 3:30 pm
Registration: 7:30 am
Lunch and materials provided with your registration

Instructor: Michael Gerardi
Wastewater Microbiologist

MEET THE INSTRUCTOR

Michael Gerardi

Wastewater Microbiologist

Michael has developed and offered numerous wastewater biology courses in the United States, Canada, Caribbean and Europe. He has over 35 years experience in the wastewater treatment profession and has authored seven wastewater microbiology texts for John Wiley and Sons. He has performed microscopic analyses of wastewater samples and provided troubleshooting services for numerous municipal and industrial wastewater treatment facilities. He managed the Williamsport Sanitary Authority wastewater treatment facilities for 10 years.
