

#1330 Calculating Chemical Dosages for Water & Wastewater Applications

6 WATER & WASTEWATER CONTACT HOURS

System engineers commonly produce charts for chemical dosages for system operators and even though water & wastewater operators work with chemical applications everyday, they often do not know how to calculate the dosage of the chemicals they are adding. Understanding the proper chemical to use for each application and the proper way to dose the chemical assures better system operations. Knowledge of proper dosage calculations enables a system operator to troubleshoot their plant more effectively and spot problems in a timely manner. This course was developed to help operators with experience sharpen their math skills and refresh their knowledge of chemicals and their applications.

Topics to be covered:

- Units, constants & using the periodic table
- Common treatment goals
- Commonly used chemical products
- Math for chemical feed applications
- Workshop activities

April 21, 2020
Racetrack Road Hotel
451 Racetrack Road
Washington, PA 15301
Washington County

Class Time: 8:00 am - 3:30 pm
Registration: 7:30 am

*Lunch and materials provided
with your registration*

Instructor: Joel Jordan
Director of Education

MEET THE INSTRUCTOR

Joel Jordan
Director of Education

Joel is currently the Director of Education at PRWA, and has held this since 2009. Previously, he held the position of Sourcewater Protection Program Manager and Specialist since 1997. Prior to PRWA, he worked as a Sanitarian and Regional Trainer for the PADEP/DEP Northwest Region and at a small town water/wastewater system in the midwest. Educational background includes a Bachelors of Science in Biology from University of Illinois-Urbana, Secondary Education Certification from Slippery Rock University and GIS certification from Penn State World Campus. Joel also is a Certified PA Warn First Responder.
