#7199 - Preventing a Major Event at a W or WW System Through Good Operational Practices

6 WATER & WASTEWATER CONTACT HOURS

Operators and superintendents must understand that many of the common practices utilized at water and wastewater systems can lead to potential major issues. We will look at the lack of verification of even the very basic chemicals delivered, document case histories where events have occurred, and show how simple and easy a verification program is to establish. Next, we will cover other operational monitoring issues. Lastly, why infrastructure age requires extra vigilance to prevent system contamination, why water stagnation and biofilm formation can lead to bacterial contamination, and how operations can minimize these issues with simple low-cost steps.

#7200 - Screening W & WW Systems for Safety, Security & Toxicity

6 WATER & WASTEWATER CONTACT HOURS

Routine monitoring of your water quality can lead to significant improvements in effective operations. This course covers daily and weekly practices that any operator can perform for better control of their water/wastewater system. The Activated Sludge Process has limitations in handling toxic influents of unknown origin and strength. Once the bug population is destroyed or inactivated due to toxicity, or loading issues, regrowth is a painful time consuming process. Quick screening of the process can provide real-time decision-making. Simple screening tools such as: Chemical Oxygen Demand tests, Quick Biological scans, Rapid Biological Toxicity Screening, & Oxidation Reduction Potential (ORP) will be covered. Quick screens of key areas of your distribution for safety/security vulnerabilities can act as an early warning tool. The course will examine case-histories, view low-cost ideas and applications to monitor strategic areas of your distribution system.

Toftrees Golf Resort

One Country Club Lane
State College, PA 16803
Centre County

Class Time: 8:00 am - 3:30 pm
Registration: 7:30 am

*Lunch and materials provided
with your registration*

Instructor: Michael Harrington
Certified Environmental Instructor

Important!
Masks are required by all attendees at PRWA training seminars.
Prior Authorization is required by our office if you are unable to wear a mask.

MEET THE INSTRUCTOR

Michael Harrington

Mike Harrington is a Certified Environmental Instructor (CET) and holds certification from Texas, Oklahoma, and Maryland in water, wastewater, and industrial wastewater. He has numerous years experience as an operator, as well as work experience with manufacturers and suppliers to the industry.

For 25 years, Mike has been writing and presenting water and wastewater operator training to municipalities, training centers, and regulatory agency professionals across the country. He holds an undergraduate BS/BA degree from Columbia Union University, and continues to pursue a Master degree from Wilmington University.
