Amount Due:

\$ _____

Pumps and their related drives are probably one of the most complex pieces of machinery a water and wastewater operator encounters. Every operator should have a good basic understanding of their system's pumping equipment and how to properly maintain it. Operation and maintenance of pumps is the function of sustaining or restoring equipment so that it can perform its intended job safely, effectively, and economically. The purpose of this course is to train operators the importance of doing just that.

Topics to be covered:

- Pump Basics
- Pump Types
- Pump Components
- Basic Pump Hydraulics
- Pump Installation
- Maintenance of Pumping Systems

Important!

**Face Coverings are required by all attendees
at PRWA training seminars.**

*Prior Authorization is required by our office if you
are unable to wear a Face Covering.*

THE PRWA PROMISE

If you're not 100% satisfied with the
training class for any reason, we will give
you a refund!
