Planning for the Future

6 WATER AND WASTEWATER CONTACT HOURS

The long term viability of any small utility depends on how well the system plans for its future. This course is designed to educate decision makers, operators and managers of the steps to take to develop short term and long range plans for the continued operation of the system. Included in the course are ways to evaluate the current system's financial and operational condition, social trends to evaluate that may mean additional capacity needed and what needs to be put into place to meet compliance now and in the future. The course also addresses the need for the community's support for expensive capitol plans and ways to gain that support.

Topics to be covered:

- System Components
- Developing the Plans
- Pitfalls and Drawbacks
- Selling it to the Community

Important!

Face Coverings are required by all attendees at PRWA training seminars.

Prior Authorization is required by our office if you are unable to wear a Face Covering.

Class Time: 8:00 am - 3:30 pm

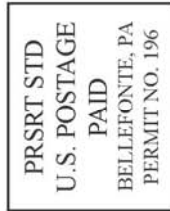

Registration: 7:30 am

Lunch and materials provided with your registration

Instructor:
Jason Opferbeck

Jason has 13 years of experience with the Labor's Union installing water and wastewater lines, building pump stations, and treatment facilities for water and wastewater systems. He was Public Works Superintendent for 14 years; managing water, sewer and highway departments and setting annual budget parameters. Jason currently holds IIA, IIB, C and D NYS Water Licenses, and he completed the Water Treatment Plant Operations Course. He is President and Owner of RAFA Systems, Inc. which specializes in manufacturing remote control, monitoring, and communications systems for water and wastewater facilities, along with a simplified GIS and asset management system that ties it all together.
