Does your system have up to date maps that can provide accurate and reliable information? Having accurate maps will help make the problems that arise from Emergency response, leak detection, storm water management, and collection system maintenance easier to pinpoint and solve. This introductory class will provide operators the opportunity to learn the ins and outs of GIS and how a developed mapping program can better equip their system with the tools necessary to tackle problems using technology.

### Topics to be covered:

- Background to GIS
- GIS Basics
- In the field data collecting techniques
- Putting your data to work
- In field examples of data collection

### Important!

**Face Coverings are required by all attendees at PRWA training seminars.**  
  
*Prior Authorization is required by our office if you are unable to wear a Face Covering.*

### THE PRWA PROMISE

If you're not 100% satisfied with the training class for any reason, we will give you a refund!
