Collection System Fundamentals I: Collection systems are the cash registers of a wastewater system, when I & I is causing more treatment costs than needed, systems are losing money. Proper mapping gives the system a base to identify where to do camera studies to look for collection system problems. Once problems are found, often times rehabilitation of the systems manholes can go a long way to correcting the problems. This course addresses the aspects of system mapping as it applies to camera studies. It also helps the systems plan how to use the results of those camera studies for the correction of I & I problems caused by manholes that need rehabilitation.

Collection System Rehabilitation and Maintenance: Inspecting, identifying and repairing collection system problems before they become major problems are an important part of an operator's responsibilities. This class will cover common collection maintenance and rehabilitation techniques for system components.

Topics to be covered:

- Collection System Mapping
- Camera Studies
- Manhole Rehab
- Maintenance Resource
- Budget Considerations

PRWA Training Event Safety

The safety of our attendees is of utmost importance. Fully vaccinated Trainers & Attendees can choose not to wear masks.

However, PRWA Training sites are private facilities with their own rules. PRWA is subject to their masking rules & Covid policies while using their facility.
