Gas Chlorination Systems, Operation Maintenance & Safety

5 WATER AND WASTEWATER CONTACT HOURS

This course is designed to provide water and wastewater treatment plant operation and maintenance personnel with a thorough understanding of chlorine gas feed systems, controls and accessories. The course is designed for presentation to both beginners and experienced operation and maintenance personnel. Upon completion of the course, students will have a clear understanding of how chlorine is transferred from the cylinder, into the water and everything in between. The slide presentations and actual equipment demonstrations help students relate to real world conditions. System operation, maintenance and safety are covered in detail.

Topics to be covered:

- The History of Chlorination
- Basic Theory of Chlorination
- Chlorination System Design
- Chlorinator Maintenance & Repair

PRWA Training Event Safety

The safety of our attendees is of utmost importance. Fully vaccinated Trainers & Attendees can choose not to wear masks.

However, PRWA Training sites are private facilities with their own rules. PRWA is subject to their masking rules & Covid policies while using their facility.
