Solutions for Solving Inflow and Infiltration: An improperly maintained collection system can add unnecessary costs to a community's wastewater customers. A collection system operator needs to know how to identify the problem areas, how to detect I & I and how to repair those problems once found. This course is designed to help collection system operators solve the costly problems associated with I & I.

Manhole Inspection, Evaluation, Rehabilitation. Techniques & Cost-Benefit Analysis: Manhole Rehabilitation can be the most cost-effective portion of your Inflow and Infiltration removal project. This class will discuss manhole inspection, evaluation, rehabilitation selection cost-benefit analysis, and installation. Pictures, case studies and demonstrations will help illustrate topics covered in this class.

Topics to be covered:

- Identifying I & I Problems
- Methods of Rehabbing Manholes
- Inspections rehabilitation techniques
- Cost comparisons

PRWA Training Event Safety

The safety of our attendees is of utmost importance. Fully vaccinated Trainers & Attendees can choose not to wear masks.

However, PRWA Training sites are private facilities with their own rules. PRWA is subject to their masking rules & Covid policies while using their facility.
