Wastewater Operator Math

6 WASTEWATER CONTACT HOURS

Review the math calculations a wastewater operator would need to properly operate and maintain a treatment facility. Since these operations are used on a daily basis, an operator can forget how to calculate those important equations needed for proper operation. Most of the math problems reflect practical situations encountered by operators.

Topics to be covered:

- Circumference, Perimeter, and area
- Volume, Flow, and Detention Time
- Percentages, Pressures, Head, Dosages, and Horsepower
- F/M Ratio, Sludge Volume Index, and Solids Loading Rates
- Hydraulic and Organic Loading Rates and Sludge Age

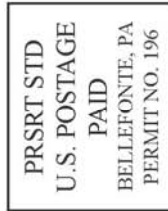

PRWA Training Event Safety

The safety of our attendees is of utmost importance. Fully vaccinated Trainers & Attendees can choose not to wear masks.

However, PRWA Training sites are private facilities with their own rules. PRWA is subject to their masking rules & Covid policies while using their facility.

Wastewater Operator Math

Class Time: 8:00 am - 3:30 pm

Registration: 7:30 am

*Lunch and materials provided with your
registration*

Instructor:
Tom Goehring

Wastewater Technician

Tom is a Wastewater Training Specialist. Tom started in the wastewater field in 1994 performing plant operations, laboratory DMR and process control testing, and collection system management until 2008. He then began work with the State of West Virginia assisting utilities with proper managerial and financial procedures until he returned to Pennsylvania and joined PRWA as a wastewater technician in 2013. He currently holds a Class A wastewater license in Pennsylvania and a Class IV wastewater license in West Virginia.
