Regulation Insights

7 WATER CONTACT HOURS

The ever-changing regulation requirements are often confusing and costly to small water utilities. Understanding the health effects caused by contaminants and the effect on the community's public health and welfare helps to clarify drinking water policies and regulations. This course is designed to provide an overview of the rule, the public benefits, critical deadlines and compliance requirements. The course will also cover how a monthly or Acute MCL Violation is triggered and how to meet the Public Notification and Reporting Requirements. Along with current standards, the six-year review of drinking water standards and the contaminant candidate list will be addressed. Understanding the reasoning and the logic behind a new regulation can help justify the cost associated with the monitoring and help to assure compliance.

Topics to be covered:

- From Risk to Rule
- Regulation Guidance:
Arsenic, Groundwater, Lead & Copper, Microbials, MTBE, Radionuclides, DBP, Public Notification, Radon, Unregulated Contaminant Monitoring and Rules vs. Regulations

PRWA Training Event Safety

The safety of our attendees is of utmost importance. Fully vaccinated Trainers & Attendees can choose not to wear masks.

However, PRWA Training sites are private facilities with their own rules. PRWA is subject to their masking rules & Covid policies while using their facility.
