Troubleshooting & Optimizing Activated Sludge Processes

6 WASTEWATER CONTACT HOURS

The purpose of this course is to expose wastewater treatment facility operators to the skills needed to effectively troubleshoot and optimize the activated sludge treatment process. This course addresses both the fundamental microbiology and chemistry of the activated sludge process, and the practical aspect of operating, optimizing, and troubleshooting. The concept of optimization as used in this training course is limited to making improvements in the operation of various unit processes.

Topics to be covered:

- What is troubleshooting
- How does the activated sludge process provide Treatment
- Multiple case studies
- How to improve plant performance
- Products to assist with operation

PRWA Training Event Safety

The safety of our attendees is of utmost importance. Fully vaccinated Trainers & Attendees can choose not to wear masks.

However, PRWA Training sites are private facilities with their own rules. PRWA is subject to their masking rules & Covid policies while using their facility.

**Instructor:
Tom Goehring**

Wastewater Technician

Tom is a Wastewater Training Specialist. Tom started in the wastewater field in 1994 performing plant operations, laboratory DMR and process control testing, and collection system management until 2008. He then began work with the State of West Virginia assisting utilities with proper managerial and financial procedures until he returned to Pennsylvania and joined PRWA as a wastewater technician in 2013. He currently holds a Class A wastewater license in Pennsylvania and a Class IV wastewater license in West Virginia.
