#7195– Corrosion Control & Flushing: What's in Your Pipes?
#8033– Chlorine in the Distribution System, Dealing with the
Good, Bad and Ugly

Location:
The Event Center at Shepherd Hills
1160 S. Krocks Rd.
Wescosville, PA 18106
Lehigh County

One Registration per person please!

Please provide the best contact information in case of class cancellation or changes.

Attendee Name: _____

PA DEP Client ID (if applicable): _____ Attendee E-Mail: _____

System/Company: _____

Attendee Cell Phone: () _____ Fax: () _____

Address: Home
 System/Company _____

City: _____ State: _____ Zip: _____

PAYMENT:

Check (payable to PRWA)

Invoice Me: Home System/Company

Credit Card: Personal Card Company/Business Card

AmEx Discover Visa MasterCard

Card Number: _____

Exp Date (mm/yy): _____ CVC (3 or 4 Digit # on card): _____

Card Billing Zipcode: _____

Name on Card (Please print): _____

Signature: _____

PRWA Member? Yes No

Attendance cost per person:

\$150 for PRWA Members

\$195 for Non-Members

Amount Due:

\$ _____

THE PRWA PROMISE

If you're not 100% satisfied with the
training class for any reason, we will give
you a refund!

Corrosion Control & Flushing: What's in Your Pipes?

This course covers the basics of corrosion in a water
distribution system, methods of control and
distribution system flushing.

Chlorine in the Distribution System, Dealing with the Good, Bad, and Ugly:

The Good - As a Bactericide -
What makes chlorine such a good disinfectant, and
why it is used so extensively? We delve into super
chlorination and chlorine used as a primary and
secondary disinfectant. The discussion will include
proper chlorination techniques and the roles of
flushing when it comes to repair and/or replacement
of distribution lines. The Bad - Need for
Dechlorination - Since chlorine is such an effective
killer, uncontrolled releasing into the environment is
not acceptable. We will discuss what chemicals are
available, the equipment needed based upon
application, proper techniques, and monitoring your
results. The Ugly - Issues with Disinfection By-
Products - Using chlorine as a bactericide is good, but
its reactions as an oxidizer cause heartache for
many systems. Other chemicals may be suitable
for your system, but if not, certain techniques
may also be helpful in limiting DBPs in the outer
reaches of your system.

Topics to be covered:

- Corrosion Control
- Water Quality Testing
- Distribution Maps and Techniques
- Nature of Chlorine
- Chlorine Safety
