Attendance cost per person:

\$115 for PRWA Members

\$150 for Non-Members

Amount Due:

\$ _____

Pumps and their related drives are probably one of the most complex pieces of machinery a water and wastewater operator encounters. Every operator should have a good basic understanding of their system's pumping equipment and how to properly maintain it. Operation and maintenance of pumps is the function of sustaining or restoring equipment so that it can perform its intended job safely, effectively, and economically. The purpose of this course is to train operators the importance of doing just that.

Topics to be covered:

- Pump Basics
- Pump Types
- Pump Components
- Basic Pump Hydraulics
- Pump Installation
- Maintenance of Pumping Systems

THE PRWA PROMISE

If you're not 100% satisfied with the training class for any reason, we will give you a refund!

Class Time: 8:00 am - 3:30 pm

Registration: 7:30 am

Lunch and materials provided with your registration

Instructor:
Brian Sekula

Brian is a PA Registered Professional Engineer and Professional Land Surveyor. He also holds water and wastewater operator licenses in PA. He has extensive experience with the Management and Design of complex systems in potable water treatment facilities, pump stations, and distribution, wastewater treatment facilities, collection, and sewage lift stations. Studies include 537 Plans, rate analyses, funding programs (grant and loans), and DEP Consent Order and Agreements. He provided operation trouble shooting and assistance for potable water and wastewater treatment plants. He has engineering degrees from Drexel University and The Pennsylvania State University and an MBA degree from Clarion University of Pennsylvania. He is semi-retired working as a Senior Engineer – Project Manager with Century Engineering, LLC, a Kleinfelder Company.
