must be processed through our website.

If you prefer to pay via credit card, please visit www.prwa.com.

Pumps and their related drives are probably one of the most complex pieces of machinery a water and wastewater operator encounters. Every operator should have a good basic understanding of their system's pumping equipment and how to properly maintain it. Operation and maintenance of pumps is the function of sustaining or restoring equipment so that it can perform its intended job safely, effectively, and economically. The purpose of this course is to train operators the importance of doing just that.

Topics to be covered:

- Pump Basics
- Pump Types
- Pump Components
- Basic Pump Hydraulics
- Pump Installation
- Maintenance of Pumping Systems

THE PRWA PROMISE

If you're not 100% satisfied with the training class for any reason, we will give you a refund!

Instructor:
Anthony Gaglierd

Anthony developed and taught Water and Wastewater Technology, at the Community College of Allegheny County, and taught water and wastewater courses for PA Department of Community Affairs for over 10 years. Anthony operated a 3 MGD surface water treatment plant and a 0.2 MGD wastewater treatment plant. He also has performed NPDES analysis for several wastewater treatment plants. He retired from the Allegheny County Health Department after 47 years.
