This course will explore the interaction between bacteria, enzymes, and higher life forms found in wastewater plants worldwide. The focus will be on the four key factors of any biomass; floc, filaments, higher life forms, and the bulk water (what we discharge).

Topics to be covered:

- Basic WW Microbiology
- Microscope Basic and Micro-exam Importance of Higher Life

April 18, 2023

Red Lion Hotel
4751 Lindle Road
Harrisburg, PA 17111
Dauphin County

Class Time: 8:00 am - 11:30 am

Registration: 7:30 am

Materials provided with your registration

Instructor:
Steven Leach

Steve Leach's interests are in the analysis, improvement, and management of wastewater related facilities and systems. He has over 34 years of experience in this field, as a staff scientist, educator, and consultant. Prior to his 20 years at Novozymes, Steve's career included many years of technical service with Polybac (Polyseed BOD Inoculum) and InterBio. Both companies focused on the biology of wastewater treatment and the application of bioaugmentation to improve plant performance or recover from upsets. Steve has performed more than 7,000 microscopic exams of both municipal and industrial plants worldwide. He has been involved with fermentation, laboratory testing, field testing, Chlorination and recovery projects, microscopic training, and installation and operation of over 20 CTX (Submerged fixed film reactors) wastewater treatment systems throughout the United States.
