**Building a Distribution System Workshop/
Counting Every Drop – Finding & Understanding
Water Loss**

6 WATER CONTACT HOURS

Building a Distribution System Workshop: Interactive demonstration showing the building of a water system from start to finish. See the installation from mainline, laterals, services, taps, restraint joints, fire hydrants and meters. Proper installation techniques and system coordination, from start to finish, including proper use of gaskets and couplers will be discussed.

Counting Every Drop - Finding & Understanding Water Loss: This course will cover methods to help system operators locate and understand water loss in the water distribution system by: Determining proper type & size water meters, conducting routine water meter testing & maintenance, using meter readings to better identify & understand customer consumption patterns, implementing distribution system sub-metering, learning basic leak detection techniques and understanding how pressure relates to flow in a distribution system.

Topics to be covered:

- Tapping Main to Tee—Tee to Hydrant
- Service Lines
- Couplings and Clamps
- Meter Testing and Maintenance
- Meter Reading
- Leak Detection
- Pressure Monitoring
