**ASSE Backflow Prevention Assembly
Repair and Maintenance Course**

6 WATER AND WASTEWATER CONTACT HOURS

The course is designed for water treatment plant operators, sewage treatment plant operators, plumbers and other maintenance personnel. The course will include a general overview of maintenance issues like spare parts stocking and ordering, tools required, cleaning methods, lubrication, general maintenance procedures on check valves and relief valves. Repair and maintenance videos will be viewed and discussed and then repair demonstrations on various devices will be performed by the instructor. A hands-on informal work session will give students time to disassemble and reassemble some of the devices on their own. A quiz will be given at the conclusion of the course. This course objective is to give a more detailed overview and introduction than the 4 hour version of this course, however, it is still not a certification course.

Topics to be covered:

- General Repair and Maintenance Information
- Safety, Tools, Cleaning, Lubricants, Parts
- Practice on all common types of checks

Instructor:
**PA Water Specialties
Company**

PAWSC is one of the top training providers in distribution and collections for water and wastewater systems. Their core training staff has over 100 years of combined experience in distribution and collection, regulatory compliance in water and wastewater, and safety. The instructors have a practical training approach supported by actually “doing the work” in the field.
