Process Safety Management

6.5 WATER AND WASTEWATER CONTACT HOURS

The participant will have the basic understanding of the OSHA standard for preventing or minimizing the consequences of catastrophic releases of toxic, reactive, flammable, or explosive chemicals into locations that could expose employees and others to serious hazards. The participant will review and have a basic understanding of Chlorine as pertains to water and wastewater operators. Participants will review and understand Chlorine safety for water treatment facilities. the training.

Topics to be covered:

- Participants will be able to analyze and identify chemicals onsite
- Participants will identify unsafe usage, handling procedures and company policies for chlorine
- Participants describe standard operating procedures and differentiate between start-up/shut-down procedures, inspection procedures and maintenance procedures
