Questions?

Call (800) 653-7792 ext. 107 or 108

This course is intended to help prepare operators for BNR operations. Discussions will include differences between BNR operations and comparing Bio-P removal to Chemical-P removal. Schematics of biological phosphorus and total nitrogen removal in WWTPs will be reviewed to discuss process control options and monitoring practices.

Topics to be covered:

- BNR Terms and Acronyms
- Bio-P vs. Chemical-P removal
- Examples of BNR Process Control
- BNR Goals and Piloting for Modifications to enhance BNR
- BNR Technologies

**Instructor:
Pete Weaver**

Water / Wastewater Technician

Pete is a water and wastewater technician / training specialist with PRWA and has worked in the water and wastewater industry since 1991. Pete's experience comes from decades of hands-on operating experience, troubleshooting and maintenance in both industry fields. He currently holds a PA Class A wastewater certification as well as a PA Class B Water certification. Pete also ran an accredited wastewater lab as well as a land application of bio-solids program for sewage sludge disposal. He is also familiar with short- and long-term municipal financial planning as well as project financing, planning, execution, and municipal budgeting.
