Solutions for Solving Inflow and Infiltration/Lift Station Operations & Maintenance

6 WASTEWATER CONTACT HOURS

Solutions for Solving Inflow and Infiltration: An improperly maintained collection system can add unnecessary costs to a community's wastewater customers. A collection system operator needs to know how to identify the problem areas, how to detect I & I and how to repair those problems once found. This course is designed to help collection system operators solve the costly problems associated with I & I.

Lift Station Operations & Maintenance: This course provides an overview of lift stations, including basic design principles, typical operation, and lift station maintenance.

Topics to be covered:

- Identifying I & I problems
- Methods of Rehabbing Manholes
- Lift Station Basics
- Operations and Maintenance Troubleshooting

Instructor:
High Tide Environmental

High Tide Environmental LLC is a small environmental consulting company focused on providing water, wastewater and stormwater consulting services. The mission is simple, help clients protect and preserve the environment through optimizing their treatment processes, while assisting them in providing effective, efficient treatment and remaining compliant with continuously changing environmental regulations. Services provided include operations consulting, development of feasibility studies, completion of rate studies, water/wastewater system design and troubleshooting, and annual reporting assistance. Lance Hoover, Company President, has been a certified water and wastewater operator for more than 25 years, with experience in many facets of the water and wastewater industry.
