

Pennsylvania Rural Water Association has been serving Pennsylvania's water and wastewater industry since 1988. Our staff is comprised of water, wastewater, sourcewater and stormwater specialists. Collectively, we have over 250 years of industry experience.

PRWA'S MISSION

The mission of the Pennsylvania Rural Water Association is to work cooperatively within the industry to support not only its members but all the water and wastewater utilities throughout the Commonwealth with professional technical support, certified training, legislative representation, and other valuable services and benefits.

Call us today so that we may access and assist your facility to conserve energy!

The Energy Efficiency Technical Assistance Program is designed to promote energy efficient practices in small water and wastewater systems. Funded through a grant from the U.S. Department of Agriculture Rural Utilities Service, the program performs energy assessments, recommends energy-efficient practices and technologies, and provides support in achieving recommendations. Technical support includes assisting with presentations to governing boards, accessing financing, training, and developing documentation.

Because energy is one of the largest costs for utilities, the program is expected to have substantial impact on operating costs, financial sustainability, and product affordability. The program will set a goal of at least 15% improvement in energy efficiency and will prioritize assessments toward utilities that serve populations living in poverty.

Energy Auditing

Energy Auditing for the Water & Wastewater Facilities of Pennsylvania

Serving the water & wastewater industry since 1988

Save up to 15% on your Utility Bills!

Our Energy Audit Includes:

- * Utility Bill Analysis
- * Lighting Upgrade Calculation
- * Estimated Energy Consumption for Inflow & Infiltration
- * Machinery Usage
- * Electronics Usage
- * Estimates annual savings from recommendations
- * Compare with Industry Benchmarks
- * Additional Energy Saving Tips

Getting Your Energy Evaluation:

- **Consultation:** We will evaluate the current facilities current energy consumption, practices and operation. We will then determine substitutes, equipment changes or alternative devices that would promote using less energy and ultimately save money, but more importantly help in sustaining our nation's energy usage.
- **Data Collection:** After doing a preliminary evaluation, we would conduct a walk-through of your facilities looking for ways we can save energy through various building improvements and electrical equipment.
- **Report Submission:** After the Energy Audit your board or council will receive a professional energy report. This report will document your present energy consumption, energy saving recommendations and the potential savings. The goal of this program is to reduce your energy consumption by 15%.

Information provided for utility rebates, loan programs, and other incentives available for energy efficiency upgrades.
